Engineering Support

Walla Walla District has engineering capability in civil, hydraulics, hydrology, structural, mechanical, electrical, and geotechnical fields. We have cost engineering expertise that is used throughout the Federal Government. In addition, the District is staffed with fish and wildlife biologists, and environmental specialists. The Walla Walla District is a full service engineering organization that has extensive experience with all phases of engineering. We specialize in projects, which involves buildings, utilities, roads, and railroads in addition to dams and channels. State-of-the-art CADD and GIS systems are used. Unique and unusual problems are not new to our engineers. The District has provided many one-of-a-kind and state of the art designs. Schedules, budgets and customer concerns are an integral part of every project and are monitored closely.

Preliminary Design

- Concept Designs
- Reconnaissance level Studies
- Feasibility level Studies
- Project Planning
- Cost Estimating

Detailed Design

- Design Documents
- Contract Drawings
- Contract Specifications
- Budget Estimates
- Government Estimates
- Bidability, Constructability and Operability Reviews
- Permits

Specialty Support

- Critical Analysis

- Technical Reviews
- Value Engineering

Construction

- Engineering Support During Construction
- Shop Drawing Review
- Construction Value Engineering
- Coordination with State and Local Governments
- As-Built Drawings
